

The project is to build a new website for an online training/teaching company (not a school)

The requirements are:

- 1- HTML5 + Php + MySQL (nothing else will be accepted, do not waste your time with anything else)
- 2- Multi language is a "Must" with ability for LTR and RTL languages.

The public pages show:

- 1- Courses Categories (languages, programming languages, technical training ... etc)
Under each category there will be the course name
under each course name there will be the levels + online level test
for example:
Languages -> English -> English Level 3
For each level there will be the scheduled date for that level
- 2- Online order for each session with ability to pay online and to apply discount code.
- 3- Rules of the "Online training".
- 4- Privacy Policy
- 5- About us
- 6- Contact us
- 7- Imprint
- 8- Login (to the private part of the website)
- 9- Mobile version must be there

The private part of the website consists of 4 levels:

- 1- For the student:
 - a. Personal information with editing ability
 - b. Ability to close the account permanently
 - c. Level Test result
 - d. Old, Active and future courses (there can be more than one active course)
 - e. Schedule for the active courses
 - f. For each course there will be:
 - i. Schedule for sessions with a link for the meeting
 - ii. Comments left from the teacher for each session in the course (old and future sessions)
this would be like a chat so the student would be able to leave a comment as well and the teacher can reply and so on.
 - iii. Final result of the course
 - g. Downloading files related to the class and to the session.
 - h. Uploading files related to each session
 - i. Ability for the student to leave feedback about after each session and after each course (student can decide if the teacher should see the feedback or not)
- 2- For teachers:
 - a. list of all sessions assigned to this teacher with ability to see students and to leave remarks as explained in the previous section
 - b. list of all students for each session.

- c. Ability to upload files for each course or for each session or for each student
 - d. Ability to download files uploaded by the students.
 - e. Special remarks from the management to the teacher
 - f. some fixed values that can be set by the management to each teacher like the email, username, password of the zoom platform
- 3- Management:
- a. Ability to access/modify the data displayed in the public section of the website
 - b. Uploading and downloading files for teachers, courses, sessions and/or students.
 - c. Ability to add students and teachers
 - d. Ability to access any part of the student and teachers and leaving remarks or filling data.
 - e. Assigning / Reassigning any student to any course.
 - f. Assigning / Reassigning any course to any teacher.
 - g. Searching for student name, teacher name, course name ... etc.
- 4- Administrator:
- a. Ability to access and change everything (including the comments left by students or teachers.)
 - b. Ability to delete uploaded files
 - c. Ability to massively delete all the data older than specific date.
